Education

Vellore Institute of Technology, Chennai

2024 – 2028

Bachelor of Technology (B.Tech) in Computer Science and Engineering

Current CGPA: **9.15 / 10.0**

Technical Skills

- **Programming Languages:** C++, Java, Python
- **Core Computer Science:** Data Structures and Algorithms, Object Oriented Programming
- **Concepts:** Problem Solving, Algorithm Design, Complexity Analysis
- **Tools:** VS Code, Git (Basic), Command Line
- **Areas of Interest:** Software Development, Competitive Programming, Backend Development

Projects

Student Management System (Java)

- Developed a console-based application to manage student information such as name, ID, department, and marks.
- Implemented functionalities for adding, updating, searching, and deleting student records.
- Applied Object-Oriented Programming concepts such as classes, encapsulation, and modular design.
- Improved data handling and program structure for better maintainability.

Library Management System (C++)

- Built a C++ program to manage library book inventory and student borrowing records.
- Implemented features including book issue, return management, and record search.
- Utilized file handling techniques for persistent storage of library data.
- Designed the system to efficiently track books and users using structured data.

DSA Problem Tracker Tool

- Developed a simple program to track solved algorithmic problems and categorize them by topic.
- Organized problems across arrays, strings, trees, graphs, and dynamic programming.
- Helped monitor consistency in coding practice and improve problem-solving discipline.
- Designed the tool to maintain structured records of solved questions and progress.

Achievements

- Consistently maintaining a strong academic performance with a CGPA of **9.15**.

- Regularly practicing Data Structures and Algorithms to strengthen analytical thinking.
- Solved numerous programming problems focusing on algorithmic optimization and efficient coding.
- Demonstrated strong logical thinking and problem solving through continuous coding practice.

Relevant Coursework

- Data Structures and Algorithms
- Object Oriented Programming
- Computer Programming
- Discrete Mathematics
- Operating Systems (Fundamentals)
- Computer networks
